12. Summary

1. Introduction

TIME365 Mobile App Version 2.0 is a major upgrade designed to improve usability, visibility, and control for both employees and managers.

This release focuses on a modern user experience, better tracking of attendance and permissions, and smoother approval workflows—all while maintaining strong security and compliance standards.

2. What's New in Mobile App Version 2?

- Complete visual and functional redesign
- Improved home dashboard with analytics
- Clear approval flows for leaves and permissions
- Manager access directly from mobile
- Enhanced attendance accuracy and security
- Real-time notifications and announcements

3. Redesigned User Experience

- The entire mobile application has been redesigned with a modern and clean interface.
- Improved layouts, readable fonts, and intuitive navigation.
- Faster access to daily actions such as attendance, leaves, and permissions.

User Benefit: A smoother, simpler, and more intuitive app experience.

4. Home Screen Enhancements

4.1 Announcements

- Important company announcements are displayed directly on the home screen.
- Announcements can be targeted to all users, departments, or individuals.
- Expired announcements are automatically removed.

4.2 Shift Information

- Assigned shift details are clearly displayed for quick reference.

5. Attendance & Monthly Summary

Monthly Work Summary (New)

- Total attendance days
- Late arrivals
- Early exits
- Permissions taken

This information is shown using simple visual charts for easy understanding.

User Benefit: Employees can track their monthly performance at a glance.

6. Leave, Permission & Assignment Experience

- Apply for leaves
- Request permissions
- Submit official permissions
- Apply for official work assignments

Each request clearly shows:

- Status (Pending / Approved / Rejected)
- History and details

User Benefit: Transparent and easy-to-track request lifecycle.

7. Manager Features on Mobile

- View department attendance
- Review leave and permission requests
- Approve or reject leaves
- Approve or reject permissions
- Approve or reject official permissions
- Approve or reject official work assignments

User Benefit: Managers can take action anytime, anywhere—without relying only on the portal.

8. Notifications & Alerts

- Instant notifications for request approvals or rejections.
- Notifications for new announcements.
- Notifications work even when the app is running in the background.

User Benefit: No missed updates or delayed actions.

9. Beacon-Based Attendance

- Attendance can be validated using assigned beacons.
- Only authorized beacons are detected.
- Unassigned beacons are ignored.

User Benefit: More accurate and location-aware attendance tracking.

10. Security & Compliance Enhancements

- Detects unsafe or manipulated device conditions
- Prevents misuse when security rules are enabled
- Logs all security events silently for review

User Benefit: Fair, secure, and reliable attendance tracking.

11. Role-Based Access Control

- Employees can view and manage only their own data.
- Managers have access to team-level data and approvals.

User Benefit: Clear access boundaries and better data privacy.

I2. Summary

TIME365 Mobile App Version 2.0 delivers:

- A modern and intuitive user experience
- Better visibility into attendance and performance
- Seamless approval workflows
- Secure and reliable attendance mechanisms

This release ensures improved efficiency, transparency, and control for organizations and their workforce.
